## ***AWARD OF SANDBOX BY SINGAPORE'S LAND TRANSPORT AUTHORITY***

MO is pleased to announce its innovative electric motorbike charging technology has today been awarded a regulatory sandbox by the Land Transport Authority, Singapore. The sandbox entitles MO to trial its technology on-the-road in Singapore ahead of full regulatory approval.

MO joins the small number of organizations, including Tesla and the Land Transport Authority itself, that have been granted sandboxes to trial electric vehicles and charging technology, placing MO squarely at the forefront of the development of the EV industry.

The award was announced by the Minister of Transport, Mr S Iswaran, during the Land Transport Industry Day 2022. MO will use the sandbox to trial its innovative centralized charging and battery swap-and-store stations in Singapore with iconic and multi-national clients Singapore Post and Prosegur.

Commenting on the award of the sandbox, MO's Co-Founder, Mr Tom Streitberg, said:

*"We are excited and humbled by the trust shown in MO by the LTA. Over the past three years we have worked tirelessly to design an electric motorbike charging system that meets the needs of riders and delivers the highest levels of safety. The sandbox gives MO the opportunity to demonstrate the safe operation of electric motorbikes in Singapore as an integral part of the Singapore Green Plan. And of course, we're excited to use Singapore as our base for accelerating the EV transition across South East Asia."*

### About MO

MO is a Singaporean company delivering innovative tech-driven charging solutions for electric motorbike fleet operators. MO's solutions are the most cost effective and least resource intensive charging solutions for fleets: solutions that are better for the budget and better for the environment. MO currently operates in Vietnam with operations in Malaysia and Singapore commencing shortly. Join with us as we accelerate the electric vehicle revolution across South East Asia!
